ALMiG

POWERFUL TECHNOLOGIES FOR EVERY APPLICATION

ALMiG is one of the leading compressed air technology system providers and has decades of experience delivering premium products in the compressed air sector. Companies all around the world trust in our customer focused solutions, our quality, innovation and flexibility.

Constant research and development form the essential foundations for the efficiency of every system manufactured by ALMiG. Only these constant enhancements and improvements enable us to react quickly and flexibly to individual customer wishes. This approach is complemented by our comprehensive understanding of the sector and extensive service offering which enable ALMiG to stand as skilled partners alongside every customer whatever the issue.

Our customers receive from ALMiG sophisticated compressor technologies and extensive service provision. The latest technologies combine excellence with the quietest possible running performance, optimal energy efficiency and particularly careful conservation of resources. You see: it pays to get to know our long-established Swabian company.

ALMiG: Compressor Systems Made in Germany

Our compressors meet the acceptance conditions according to:

- ISO 1217-3 Annex C-2009
- ASME
- OSHA

and comply with the CE guidelines. Even the strictest acceptance conditions such as DNV-GL, BUREAU VERITAS, LLOYD'S REGISTER OF SHIPPING, ABS and others are a matter of course for us.

The ALMiG company is certified according to: IRIS 02, ISO 9001: 2008, ISO 14001: 2004

Company history

1923

The plant in Köngen is founded as a small mechanical workshop for the production of car air pumps for filling car and truck tyres.

2000

Variable speed control and water injected systems are included in product development.

Today

The company is managed by Viktor Weber. ALMiG Kompressoren GmbH employs around 200 people at its Köngen site and continues to produce almost all compressors in Germany, at the same location as in 1923.

Today ALMiG is not only a successful supplier of compressors but also offers tailor-made systems for the generation and treatment of compressed air.

1953 - 1965

Start of the development of new single and double stage compressors. The production of industrial compressors with up to 5 cylinders begins.

2007

Following a change in ownership, the newly founded ALMiG Kompressoren GmbH officially commenced operations on 1 July 2007. The name ALMiG means Automatische Luftpumpen (automatic air pumps) - Made in Germany.

1978

Screw compressor technology is added to the product portfolio alongside piston compressor technology.

2012

ALMiG becomes part of the globally operating Taiwanese Fusheng Group. This will provide ALMiG with a sustained strengthening of its global sales network.

Five TOP reasons for ALMiG

1

Experience & Reliability

We have been developing and producing compressors in Germany since 1923. First-class German engineering, based on our experience, guarantees highest reliability of our solutions.

2

Quality

The most demanding certifications, recurring audits and comprehensive tests guarantee consistent quality throughout the entire service life of ALMiG compressors.

3

Highest efficiency

Our compressors combine excellent performance values with maximum running smoothness, optimum energy efficiency and a particularly careful use of resources.

4

Customer-oriented solutions

Extensive industry know-how and continuous development and improvement enable us to react quickly and flexibly to individual customer requirements.

5

All-round service

Thanks to our comprehensive range of services, ALMiG is a competent partner for every customer at all times to answer all questions.

ALMiG

The right solution for every application.

Our products

Efficiency and sustainability are ALMiG's guiding values. With the „Green & Blue“ orientation, we are constantly developing our products with regard to resource-saving and environmentally compatible use. In the „Blue“ area, we are continuously working on increasingly efficient compressors in order to reduce the energy consumption of the plants and achieve an ever better specific performance.

The „Green“ area includes our oil-free compressors and components for compressed air treatment. The less oil is used, and thus gets into the environment together with other dirt particles, the better for our environment. That is why we are continuously developing our oil-free systems further and our treatment components are also undergoing a constant optimisation process.

Oil-injected compressors

- High efficiency and reliability
- All possible drive options
- Low maintenance costs
- Low noise level

Power range: 4 to 315 kW
Volume flow: 0.27 - 62.7 m³/min
Operating pressure up to 13 bar

Speed-controlled compressors

- Highly efficient
- Adjust exactly to the compressed air requirement
- Costly idle times are reduced to a minimum

Power range: 5.5 to 315 kW
Volume flow: 0.27 - 62 m³/min
Operating pressure up to 13 bar

Oil-free compressors

- 100 % oil-free compressed air
- Extremely low energy consumption during operation
- User-friendly microprocessor control
- Minimum maintenance effort
- Air or water cooling

Power range: 15 to 2240 kW
Volume flow: 0.21 - 330 m³/min
Operating pressure up to 10 bar

Compressed air treatment

- Low pressure loss
- Reliable cleaning of the compressed air
- Safety in operation

Turnkey solutions

Whether you are planning a new compressor station or are using your existing compressed air station - We are at your side with experience and know-how. ALMiG offers you turnkey solutions for an economical and efficient compressed air station - complete with compressed air audit, compressor design, piping and connection to your system. With ALMiG you get everything from one source.

Special solutions

ALMiG offers you a variety of special compressed air solutions - individually adapted to your requirements.

ALMiG TRACKAIR - Compressors for the commercial vehicle and railway sector
ALMiG develops, produces and sells all main components for the air supply system in rail vehicles.

ALMiG Marine Compressors - Most reliable products even under harsh conditions
Reliability, robustness even at high temperatures and a design for flexible pressure adjustments are just some of the advantages of our marine compressor series.

ALMiG compressed air systems in containers
With compressed air containers from ALMiG you are independent of the capacities and ambient conditions of your production halls.

Controls

Intelligent monitoring, reliable documentation.

ALMiG Industry 4.0

- Intuitive user guidance with all information at a glance
- Screen diagonals up to 7" and touchscreen display
- Configuration and commissioning has never been easier
- Demand-based control of up to 10 compressors
- Permanent data logging functionality on SD card
- Extensive statistics available
- Communication between different components within your station
- Unlock previously unattainable savings potential through the interaction of compressed air generators and consumers

ALMiG WebControl

- Simple operation via standard Internet browsers (incl. smartphones and tablets)
- You decide: Access via the company's own network or worldwide via Internet
- Protected dial-in with different access rights
- Continuous monitoring of all operationally relevant parameters
- Active e-mail notifications for warnings, maintenance or faults
- Convenient transfer of all relevant data into Office programs such as MS-Excel
- Graphically appealing display of the parameters as tables or graphics

Service - Anytime. Worldwide.

High-quality products such as ALMiG's compressed air solutions deserve first-class service. We therefore offer you the complete service program: from comprehensive consulting, to ensuring availability and increasing economic efficiency, to the development of energy saving potentials. Reliability, fast response times and competent advice are our top priorities. We offer a comprehensive network of highly qualified ALMiG service technicians and specially trained and authorised service partners. In this way we ensure the operational safety of your compressed air station at all times, both at home and abroad.

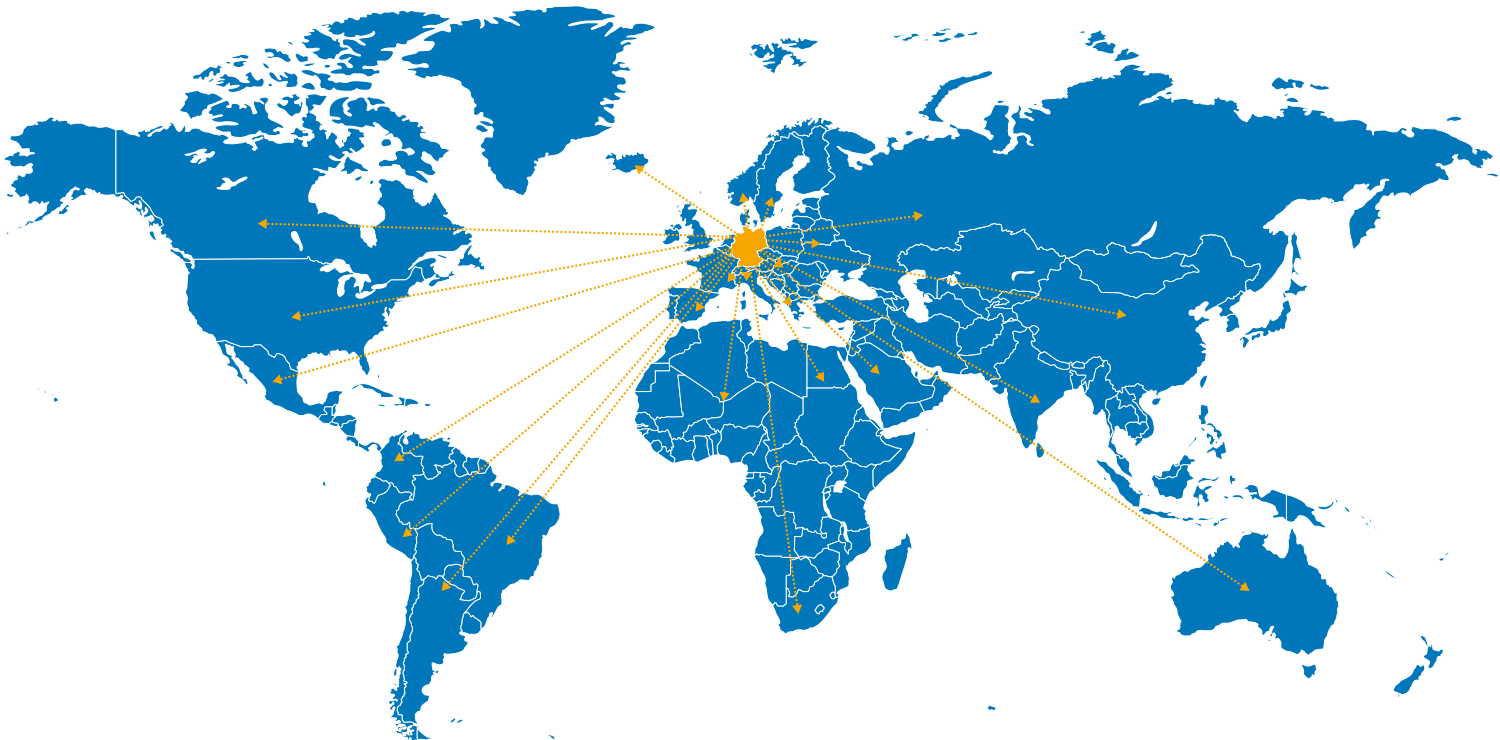

- Consulting, planning and installation
- Measurements of compressed air consumption and quality
- Maintenance contracts
- Original spare parts
- Further training, including energy-saving and compressed air seminars

The ALMiG AIRCARE package gives you the opportunity to assert claims for rectification of defects even after the statutory warranty period has expired. Keep a full overview of your service costs and avoid unpleasant surprises.

The special feature of ALMiG AirCare is that this extension **not only includes the newly purchased ALMiG compressor(s), but also additional components** such as refrigeration dryers, filters etc. (see AirCare Conditions).
